2 YEARS OF AWARD WINNING PRODUCTS!

Freecom products are not just about adding additional storage capacity to your computer or enjoying multimedia files. Design, quality, performance and ease of use are just as important. This has been confirmed by Freecom winning the prestigious IF Design Award 2007 for our new range of external Hard Drives, the Red dot design award 2007 for our ToughDrive series and the USBCard, and more recently the new MusicPal has been awarded the 2008 iF Design Award! Elegant and sophisticated designs, without compromising on quality, reliability and usability. If you want to experience a winner.... look no further!

10000 RADIO STATIONS

No, it's not a typing error. The MusicPal brings you 10000 radio stations, from all over the world, to YOUR home. Connects to your wireless network, and seconds later you're moving and grooving to dance music from Japan or hard rock from America.

But there's more. What about playing video files directly on your TV without the use of a PC? Check out our multimedia products - you will be amazed!

- Free helpdesk support
- All Freecom devices meet the highest industry standards; CE, FCC and WEEE

- Including remote control
- Compatible with any USB stick, any USB hard drive
- Only 91 x 67 x 21 mm in size

USE WITH ANY
USB (HARD) DRIVE

HOW YOUR USB (HARD) DRIVE BECOMES A MEDIA PLAYER

External USB hard drives are a common PC accessory in every household. A lot of these drives are used to store (downloaded) movies and music on. Problem is... everytime you want to look at a movie from this hard drive you need to go behind your PC or notebook to watch it. Not the ideal screen to watch a movie on... It would be so much better to be able to watch this movie sitting on your couch, looking at the TV screen in your living room.

The MediaPlayer XS makes it all possible. Simply connect your USB hard drive (no matter which brand!) to the MediaPlayer XS, connect the MediaPlayer XS to your TV, and you're ready to watch movies directly from your hard drive, without the use of a PC, in the comfort of your own living room! Of course the concept also works with other USB devices such as a USB stick.

20X LIGHTNING SPEED

Gone are the days where it took 30 minutes to burn a CD. The Freecom 20x speed external DVD RW Recorders bring you the fastest writing speed currently available. Shipped with award-winning DVD/CD burning software. And all including LightScribe laser labeling technology. For notebook users we have the USB & FireWire Mobile DVD RW. Fast and reliable DVD/CD burning – no compromises on quality. But still very affordable. A winner!

SCALAR50 LIBRARIES

FULLY AUTOMATED SECURITY FOR COMPANY DATA

Scalar 50 is the easy-to-use library platform that gives growing mid-range and entry backup environments user-friendly, reliable backup and restores capabilities with features that simplify everything from initial set-up to adding capacity over time. Easy to operate and maintain, the Scalar 50 provides a user-friendly interface to facilitate set-up and operation. The intuitive set-up wizard takes you through initial configuration step-by-step, so the library is up and running quickly and efficiently. And once the library is set up, our Guardian software will proactively monitor the library to prevent problems and speed issue resolution. Even keeping up with data growth is simplified with the Scalar 50. Its streamlined scalability enables the library to grow along with your user data – without disruption. Start with 38 slots and scale up to 76 slots as needed.
